I am a positivity-driven and confident individual with a passion for technology and a strong aptitude for learning new technologies. I am seeking a position as a React Js Developer where I can apply my in-depth knowledge of React.js, Node.js, Next js along with my proficiency in JavaScript.

Skills

- ★ **Comfortable With** HTML, CSS, Javascript, ES6, Rest API, React.js, Next js, Redux, Rtk Query, Node js, Express js, MongoDB, MySQL, Material Ui, Tailwind, Styled Components, React Hook Form, SASS, and React Bootstrap.
- ★ **Familiar With** C, C++, Java, Postgress.
- ★ **Competitive Using Tools:** Github, Nginx, Chrome dev tools, VS Code, Firebase, Heroku, Netlify, Figma.

Projects

★ Hotel Booking Website (Full Stack) Jan 2023

[Live Site](#) | [GitHub Link](#)

Features:

- Allow users to view available rooms for their desired dates and select the room type they prefer, such as standard, deluxe, suite, etc.
- Calculate and display the total price for the selected room, including taxes, fees, and any optional extras or add-ons.
- Prompt users to enter their personal information, including name, contact details, and any special requests or preferences they may have.

- Check the availability of the selected room in real-time to ensure it is still available during the booking process. If the room becomes unavailable, provide alternative options or suggest similar rooms.
- Implement a secure payment gateway to handle online payments for room booking. Provide multiple payment options and ensure the user's sensitive information is encrypted and protected.
- Provide users with a dashboard or account area where they can view and manage their room reservations, including accessing booking details, making changes, and requesting assistance.

Technology Used: React, Rtk Query, MongoDB, Node, Express, Styled Component, SASS, Sweetalert, React Router, React Hook Form, etc.

★ Club Compass Pro Android App (React Native) March 2023

[Apk Link](#) | [Client Site GitHub Link](#) | [Server Site GitHub Link](#)

Features:

- Include a dedicated section that provides an overview of the science club, its mission, goals, and objectives. Highlight the club's history, achievements, and any notable contributions to the scientific community.
- Create profiles for each committee member, including their name, role, area of expertise, and contact information. Allow committee members to update their profiles and display their contributions or achievements within the club.
- Create profiles for faculty members involved with the science club. Include their name, department, areas of expertise, office hours, and contact information. Provide a brief description of their research interests or teaching experience.
- Enable students to access their academic results, including scores, grades, and feedback, for various subjects or exams. Provide a user-friendly interface to view and track their progress over time.

Technology Used: React Native, MongoDB, Node JS, Express JS, Firebase, Async Storage, Sweetalert, etc.

Professional Experience

React.js Developer, FYNTUNE(January 2022 - Present)

- Developed and maintained React.js applications for clients in the financial services industry.
 - Collaborated with designers, product managers, and other developers to build user-friendly and responsive interfaces.
 - Implemented best practices for performance optimization, accessibility, and security.
 - Worked with Redux, Rtk Query, and other front-end tools and frameworks.
 - Successfully delivered multiple projects on time and within budget.
- Contributed to code reviews, testing, and documentation efforts.
